Maleimides. More commonly, the maleimide chemistry is used in combination with amine-reactive NHS-ester chemistry in the form of heterobifunctional crosslinkers that enable controlled, two-step conjugation of purified peptides and/or proteins.

Ubiquitin-like proteins (Ubl's) are conjugated to target proteins or lipids to regulate their activity, stability, subcellular localization, or macromolecular interactions. Similar to ubiquitin, conjugation is achieved through a cascade of activities that are catalyzed by E1 activating enzymes, E2 conjugating enzymes, and E3 ligases.

Bio-Synthesis, leader in providing custom protein expression services as well as protein conjugation and modification with target molecule of your choice. We are devoted to delivering affordable peptide-biopolymer hybrid complexes, and offer comprehensive modification and labeling options to be used for life science research, diagnostics, and drug discovery.

### **Protein Conjugation - Bio-Synthesis, Inc.**

Table of Contents. Procedures, analysis and complications. Application of chemical crosslinking to soluble proteins. Crosslinking of membrane proteins. Preparation of enzyme immunoconjugates and other immunoassay components. Preparation of immunotoxins and other drug conjugates for targeting therapeutics. Conjugation of proteins to solid matrices.

HRP conjugation of client provided proteins targeting a client specified HRP-to-Protein ratio. Excess HRP removal services are available at additional costs. Buffer exchange into PBS; all other formulations may require an additional fee per sample. Quantitation of the average number of HRP molecules per protein.

Conjugate Definition. In chemistry, there are three possible definitions of the term "conjugate". (1) A conjugate refers to a compound formed by the joining of two or more chemical compounds. (2) In the Bronsted-Lowry theory of acids and bases, the term conjugate refers to an acid and base that differ from each other by a proton.

Protein Conjugation. SACRI antibody services (SAS) have highly skilled scientists dedication to antibody and protein conjugation. SAS staff have over 20 years experience in protein chemistry and cross-linking techniques. Whether you wish to link a peptide antigen to a carrier molecule for immunization or wish to label antibodies,...

With advances in the fields of bioorthogonal chemistry and protein engineering, there is growing interest in producing ADCs by site-specific conjugation to the antibody, yielding more homogeneous products that have demonstrated benefits over their heterogeneous counterparts in vivo. Here, we chronicle the development of a multitude of site-specific conjugation strategies for assembly of ADCs and provide a comprehensive account of key advances and their roots in the fields of bioorthogonal ...

Carbonyl-reactive Crosslinker Chemistry ... Glutaraldehyde (a bis-aldehyde), if added in large excess, can be used to aldehyde-activate the amines of one purified protein for conjugation by reductive amination to another protein. This is the reverse of the hydrazide-activation strategy described above using ADH ...
