Modern Data Warehouse | Microsoft Azure
The 3 Biggest Issues with Data Warehouse Testing. The #1 Method to compare data from sources and target data warehouse – Sampling, also known as "Stare and Compare" - is an attempt to verify data dumped into Excel spreadsheets by viewing or "eyeballing" the data. Less than 10% is usually verified and reporting is manual. The #2 Method – MINUS queries – subtracts data sets from ...

Data Warehouse Testing and ETL Testing | QuerySurge
A modern data warehouse lets you bring together all your data at any scale easily, and to get insights through analytical dashboards, operational reports, or advanced analytics for all your users.

Modern Data Warehouse Architecture | Microsoft Azure
A data warehouse provides users with a centralized repository of enterprise data from which to glean insights. Data warehouse automation helps IT teams manage data faster, with less risk, and at a lower cost. WhereScape's data warehouse automation tools allow you to fast track your data warehouse projects.

Data Warehouse Automation | WhereScape
Palletize or package items to streamline warehouse operations. Warehouse Insight has full license plating capabilities. For businesses that need to track groups of items, such skids of materials, shipping containers, crates or boxes, etc., Warehouse Insight makes it easy.

Mobile Warehouse Data Collection from Insight Works
When comparing data manually users can only test sample amount of data using excel or by eyeballing. Since the full dataset is not tested there is less test coverage as well as there is a high chance of encountering data issues in the production system.
