of pain management including pain control, physical and psychosocial function, quality of life, and complications. (7) Provide for an interdisciplinary, multi-modal approach to pain management that emphasizes optimal pain control, improved function, and quality of life.

### **VHA Directive 2009-053, Pain Management**

In a review by Turk in 2002, 13 multidisciplinary chronic pain management was determined to be superior to singular treatments including surgery, pharmacologic intervention, spinal stimulators and intrathecal opioid pumps, in terms of pain reduction, improved physical functioning,...

### **The Demise of Multidisciplinary Pain Management Clinics?**

Indeed, this biopsychosocial approach to pain has led to the development of the most therapeutic- and cost-effective interdisciplinary pain management programs. In their effectiveness, these programs far exceed any of the earlier overly-simplistic biomedical reductionist approaches to the treatment of pain.

### **The Biopsychosocial Approach - Practical Pain Management**

Establishing and maintaining an institutional pain performance improvement plan is a Joint Commission requirement. 5 Institutions should develop interdisciplinary approaches to acute pain management with clear lines of responsibility for achieving good acute pain control. 5, 22, 24 This interdisciplinary approach includes an individualized plan of care for pain control, developed in collaboration with the patient and family. Systems should be in place to monitor pain management that alerts ...
